

MICROSOFT WORD IN MEDICAL PRACTICE BY EXAMPLES – SUPPLEMENTARY ACTIVITY

Exercise 1

1. Create a new Word document containing the following text:

Breast Cancer Cases/Deaths per Year

Breast cancer is the second leading cause of cancer deaths in women today (after lung cancer) and is the most common cancer among women, excluding *nonmelanoma* skin cancers. According to the American Cancer Society, about *1.3 million women* will be diagnosed with breast cancer annually worldwide about 465,000 will die from the disease. Breast cancer death rates have been dropping steadily since 1990, according to the Society, because of earlier detection and better treatments.

The number of breast cancer worldwide is presented in Table 1 [1].

Table 1. Numbers of breast cancer per 100,000
