# CONTENTS

■ ■ Preface, vii

**CHAPTER 1 General Overview 1**

There are no problems/solutions in chapter 1 of the textbook.

**CHAPTER 2 Descriptive Statistics 2**

Review of Key Concepts, 2
2.1 Measures of Location, 2
2.1.1 Arithmetic Mean, 2
2.1.2 Median, 3
2.1.3 Stem-and-Leaf Plots, 3
2.1.4 Percentiles, 4
2.1.5 Geometric Mean, 5
2.2 Measures of Spread, 6
2.2.1 Range, 6
2.2.2 Quasi-Range, 6
2.2.3 Standard Deviation, Variance, 7
2.2.4 Coefficient of Variation (CV), 8
2.3 Some Other Methods for Describing Data, 8
2.3.1 Frequency Distribution, 8
2.3.2 Box Plot, 8
■ ■ Problems, 9
■ ■ Solutions, 10
■ ■ Reference, 11

**CHAPTER 3 Probability 12**

Review of Key Concepts, 12
3.1 Frequency Definition of Probability, 12
3.2 Multiplication Law of Probability, 13
3.3 Addition Law of Probability, 13
3.4 Conditional Probability, 13
3.4.1 Relative Risk, 14
3.5 Total Probability Rule, 14
3.6 Sensitivity, Specificity, Predictive Values of Screening Tests, 15
3.6.1 ROC Curves, 16
3.7 Bayes' Theorem, 17
■ ■ Problems, 18
■ ■ Solutions, 21
■ ■ References, 26

**CHAPTER 4 Discrete Probability Distributions 28**

Review of Key Concepts, 28
4.1 Random Variable, 28
4.2 Combinations, Permutations, and Factorial, 28
4.3 Binomial Probability Distribution, 29
4.4 Methods for Using the Binomial Distribution, 30
4.5 Using Electronic Tables, 30
4.6 Expected Value of the Binomial Distribution, 31
4.7 Variance of the Binomial Distribution, 31

4.8 Poisson Distribution, 32
4.9 Use of Electronic Tables for Poisson Probabilities, 32
4.10 Expected Value and Variance of the Poisson Distribution, 33
4.11 Poisson Approximation to the Binomial Distribution, 33
■ ■ Problems, 33
■ ■ Solutions, 38
■ ■ References, 43

**CHAPTER 5 Continuous Probability Distributions 44**

Review of Key Concepts, 44
5.1 Probability Density Function, 44
5.2 Expected Value and Variance of a Continuous Random Variable, 45
5.3 Normal Probability Density Function, 45
5.4 Empirical and Symmetry Properties of the Normal Distribution, 45
5.5 Calculation of Probabilities for a Standard Normal Distribution, 46
5.6 Calculation of Probabilities for a General Normal Distribution, 47
5.7 Inverse Normal Distribution, 47
5.8 Use of Electronic Tables for the Normal Distribution, 47
5.9 Normal Approximation to the Binomial Distribution, 48
5.10 Normal Approximation to the Poisson Distribution, 50
■ ■ Problems, 50
■ ■ Solutions, 54
■ ■ References, 65

**CHAPTER 6 Estimation 66**

Review of Key Concepts, 66
6.1 Relationship of Population to Sample, 66
6.2 Random-Number Tables, 66
6.3 Randomized Clinical Trials, 67
6.3.1 Techniques of Study Design in Randomized Clinical Trials, 67
6.4 Sampling Distribution, 67
6.5 Estimation of the Mean of a Distribution, 67
6.6 Standard Error of the Mean, 68
6.7 The Central-Limit Theorem, 68
6.8 Interval Estimation for the Mean, 68
6.8.1 Use of Confidence Intervals for Decision-Making Purposes, 69
6.8.2 Factors Influencing the Length of a Confidence Interval, 69
6.9 Estimation of the Variance of a Distribution, 69
6.10 Estimation for the Binomial Distribution, 70
6.10.1 Large-Sample Method, 70
6.10.2 Small-Sample Method, 71
6.11 Estimation for the Poisson Distribution, 71
6.12 One-Sided Confidence Limits, 72
■ ■ Problems, 73
■ ■ Solutions, 76
■ ■ Reference, 79

**CHAPTER 7 Hypothesis Testing: One-Sample Inference 80**

Review of Key Concepts, 80
7.1 Fundamentals of Hypothesis Testing, 80
7.2 One-Sample *t* Test, 80
7.3 Guidelines for Assessing Statistical Significance, 81
7.4 Two-Sided Alternatives, 82
7.5 The Power of a Test, 83
7.6 Sample Size, 84
7.7 Relationship Between Hypothesis Testing and Confidence Intervals, 85
7.7.1 Relative Advantages of Hypothesis-Testing Versus Confidence-Interval Approaches, 85
7.8 One-Sample $\chi^2$ Test, 85
7.9 One-Sample Inference for the Binomial Distribution, 86
7.10 One-Sample Inference for the Poisson Distribution, 87
■ ■ Problems, 88
■ ■ Solutions, 92
■ ■ References, 98

**CHAPTER 8 Hypothesis Testing: Two-Sample Inference 99**

Review of Key Concepts, 99
8.1 Paired *t* Test, 99
8.2 Two-Sample *t* Test for Independent Samples—Equal Variances, 100
8.3 *F* Test for the Equality of Two Variances, 101
8.3.1 Characteristics of the *F* Distribution, 102
8.4 *t* Test for Independent Samples—Unequal Variances, 102
8.5 Sample-Size Determination for Comparing Two Means from Independent Samples, 104
■ ■ Problems, 105
■ ■ Solutions, 111
■ ■ References, 122

**CHAPTER 9 Nonparametric Methods 123**

Review of Key Concepts, 123
9.1 Types of Data, 123
9.2 The Sign Test, 123
9.2.1 Large-Sample Test, 123
9.2.2 Small-Sample Test, 124
9.3 The Wilcoxon Signed-Rank Test, 124
9.4 The Wilcoxon Rank-Sum Test, 126
■ ■ Problems, 127
■ ■ Solutions, 128
■ ■ Reference, 131

**CHAPTER 10 Hypothesis Testing: Categorical Data 132**

Review of Key Concepts, 132
10.1 Comparison of Two Binomial Proportions, 132
10.1.1 Two-Sample Test for Binomial Proportions (Normal-Theory Version), 132
10.2 The 2 × 2 Contingency-Table Approach, 133
10.2.1 Relationship Between the Chi-Square Test and the Two-Sample Test for Binomial Proportions, 135
10.3 Fisher's Exact Test, 135
10.3.1 Computation of *p*-Values with Fisher's Exact Test, 136
10.4 McNemar's Test for Correlated Proportions, 136
10.5 Sample Size for Comparing Two Binomial Proportions, 138
10.6 *r* × *c* Contingency Tables, 139
10.7 Chi-Square Goodness-of-Fit Test, 141
10.8 The Kappa Statistic, 143
■ ■ Problems, 144
■ ■ Solutions, 148
■ ■ References, 158

**CHAPTER 11 Regression and Correlation Methods 159**

Review of Key Concepts, 159
11.1 The Linear-Regression Model, 159
11.2 Fitting Regression Lines—The Method of Least Squares, 160
11.3 Testing for the Statistical Significance of a Regression Line, 161
11.3.1 Short Computational Form for the *F* Test, 162
11.4 The *t* Test Approach to Significance Testing for Linear Regression, 163
11.5 Interval Estimation for Linear Regression, 164
11.6 $R^2$, 165
11.7 Assessing the Goodness of Fit of Regression Lines, 165
11.8 The Correlation Coefficient, 166
11.8.1 One-Sample Inference, 166
11.8.2 Two-Sample Inference, 167
11.8.3 Sample Size Estimation for Correlation Coefficients, 168
11.9 Multiple Regression, 168
11.9.1 Multiple Regression Model, 168
11.9.2 Interpretation of Regression Coefficients, 169
11.9.3 Hypothesis Testing, 169
11.9.4 Several Types of Correlation Associated with Multiple Regression, 170
11.10 Rank Correlation, 170
■ ■ Problems, 171
■ ■ Solutions, 176
■ ■ References, 185

**CHAPTER 12 Multisample Inference 186**

Review of Key Concepts, 186
12.1 General Concepts, 186
12.2 One-Way Analysis of Variance—Fixed-Effects Model, 187
12.2.1 Overall Test of Significance, 187
12.3 Comparisons of Specific Groups—Least Significant Difference (LSD) Approach, 188
12.4 Comparisons of Specific Groups—Bonferroni Approach, 189
12.5 Linear Contrasts, 190
12.6 One-Way Analysis of Variance—Random-Effects Model, 191
12.7 The Kruskal-Wallis Test, 192
■ ■ Problems, 193
■ ■ Solutions, 195
■ ■ References, 202

**CHAPTER 13 Hypothesis Testing: Person-Time Data 204**

Review of Key Concepts, 204
13.1 Study Design, 204
13.2 Measures of Effect for Epidemiological Data, 204
13.2.1 Stratified Data, 206
13.3 Multiple Logistic Regression, 207
13.3.1 Multiple Logistic-Regression Model, 208
13.3.2 Interpretation of Regression Parameters, 208
13.3.3 Hypothesis Testing, 208
13.4 Meta Analysis, 209
13.5 The Cross-Over Design, 210
13.6 Clustered Binary Data, 212
13.7 Special Topics in Epidemiological Data Analysis, 214
13.7.1 Establishing Clinical Equivalence, 214
13.7.2 Accounting for Measurement Error, 214
■ ■ Problems, 215
■ ■ Solutions, 218
■ ■ References, 225

**CHAPTER 14 Hypothesis Testing: Person-Time Data 226**

Review of Key Concepts, 226
14.1 Measures of Effect for Person-Time Data, 226
14.2 One Sample Inference for Incidence Rate Data, 226
14.2.1 Point and Interval Estimation of Incidence Rates, 227
14.3 Comparison of Incidence Rates, 228
14.4 Estimation of the Rate Ratio, 228
14.5 Inference for Stratified Person-Time Data, 229
14.5.1 Estimation of the Rate Ratio for Stratified Data, 230
14.6 Testing for Trend-Incidence Rate Data, 231
14.7 Introduction to Survival Analysis, 233
14.7.1 Censored Data, 234
14.8 Estimation of Survival Curves, 234
14.9 Comparison of Survival Curves, 234
14.10 The Proportional-Hazards Model, 236
14.10.1 Interpretation of Parameters, 237
14.10.2 Hypothesis Testing, 237
■ ■ Problems, 238
■ ■ Solutions, 240
■ ■ Reference, 248

**CHAPTER 15 Miscellaneous Problems 249**

15.1 Introduction, 249
■ ■ Problems, 249
■ ■ Solutions, 257
■ ■ References, 270

**APPENDIX Statistical Functions in Excel 271**

*NOTE:* There is no Chapter 1 in this Study Guide because the chapters correspond to those in Fundamentals of Biostatistics, Sixth Edition, in which Chapter 1 was a general overview and contained no problems or exercises.
